# Introduction

**Nowadays, it's hard to imagine education only taking place through face-to-face interactions.**

Daniel Cassany

The Campus Difusión platform of educational materials and resources was launched in 2016, aimed at teachers and students.

For teachers:

- Who use hard-copy or digital textbooks.
- Who are looking for high-quality materials.
- Who want to plan classes, make their classes more dynamic and effectively monitor their students.
- Who need turn-key educational materials which are easy to use in the classroom.

For students:

- Who want digital content.
- Who need a place for work and discussion.

Today, we are aware of how the teaching and learning process has changed and how some students study entirely in-person, some totally digitally and others in a hybrid combination of the two. This is why we have updated our Campus Difusión, retaining the digital content, interactive resources, digital itineraries, etc. but with a new focus on management, monitoring and communication processes.

This guide will help you understand the new functions, walk you through the experience and help you get the most out of the new Campus Difusión. Remember that this is just a walkthrough and that we've also made lots of other training materials like [Video Tutorials](#) regarding the changes available to you.

If you can't find the answer to one of your questions, please get in touch with us via [this form](#).

## Changing the language

The Campus Difusión interface is available in several languages: Spanish, French and English. You can change the language on the login page.

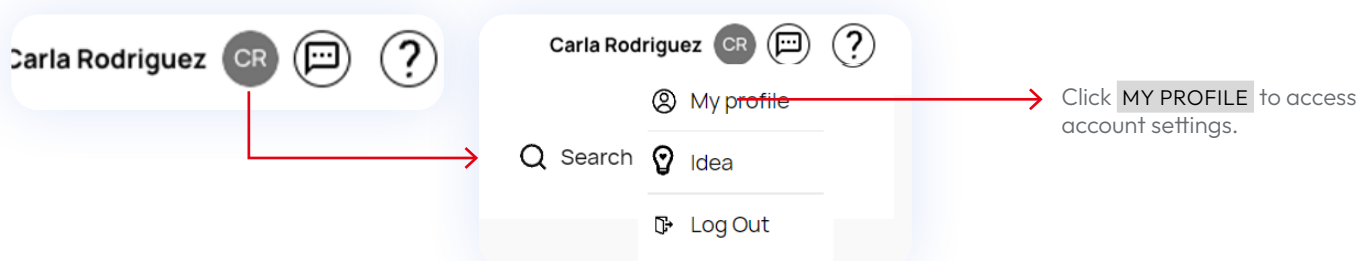

You can change the language on the login page from the drop-down menu that you'll find in the top right corner.

To download the app, enter your device's Android or iOS store and search for Magnet Learn.

Install the app from your device by clicking **INSTALL** if you use Google Play or the download icon in the Apple Store and the process will begin automatically. This may take a few minutes, depending on the strength of your connection.

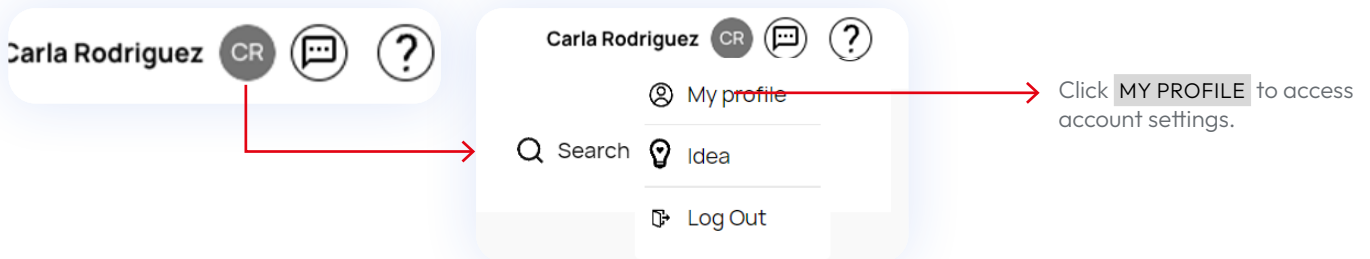

If you would prefer to install the app from your computer, you can do so by clicking one of these buttons:

Look for the **APP DOWNLOAD > MOBILE APP** section. When you click the icon, the QR code will open on your screen.

# Finding the code of your textbook

To add new products to Campus Difusión, you'll need a code. You can find out how to redeem a code in the [Adding content](#) section.

The code you can get from a hard-copy manual is the ISBN, which consists of 13 numbers which you'll find on the back cover of the manual.

The code you can get from a digital textbook purchased from our online store consists of 20 alphanumeric characters.
